

FACILITIES DEVELOPMENT GOALS

As part of the District's commitment that every school should offer every student a safe, supportive, resource-rich learning environment that complements the child's learning abilities, it is the District's goal to improve its facilities. Initiatives the District shall implement to develop improved facilities include:

- A routine building maintenance and upkeep program;
- Facilities management based on a long range plan, which includes identification of all repairs needed, projected costs of repairs and a timeline for implementation;
- Review and revamping as necessary of the allocation of custodial staff throughout the District;
- Design and creation of school gardens at selected schools; and
- Operation of a Capital Plan that continues the Roof Replacement Program, establishes a prioritized building improvement program and identifies and addresses long-term building capacity issues.
